

# Our Simple Cloud Backed-Backup Solutions

# What's at risk without a robust backup solution?

Significant  
data loss

Expensive  
downtime

Loss of  
customer faith

Compliance  
issues

Lost  
revenue

# What does the right backup solution offer?

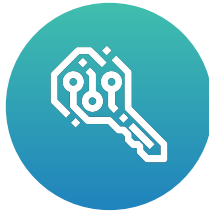

3-2-1 Backup

Monitoring

Reporting

Licensing  
control

Image-based &  
file-level backup

Support for Microsoft SQL  
Server & Microsoft Exchange

# What features and benefits can you expect?

**Cross-Platform Support:** Whether you work on Windows, Mac or Linux, restoring your data from file, image or virtual machine is simple.

**Flexible Licensing:** Get full customer support for your business and for trial licenses assigned to current or potential customers.

**Reliable Storage:** Rest easy knowing your backup is powered by a reliable, reputable storage provider.

# Data Management

## Data Storage

- Local backup
- Client-side, on-site encryption
- Data lifecycle management support
- Public cloud storage support
- Backup to network shares & NAS devices

## Data Restore

- Restore from file, image and virtual machine backups
- Item-level restore from Exchange
- Item-level restore from Hyper-V & VMware
- Bare-metal restore
- Self-restore service

# The Onboarding Process

## During implementation, we'll:

- Provide an estimated timeframe to complete implementation
- Create a step-by-step recovery plan with detailed instructions for use
- Back up your workstations, servers, home computers and mobile devices
- Move your most important data to the cloud to keep it impervious to disaster
- Create a plan for ongoing, consistent testing and backup of your vital files

# We're ready to help. Get in touch today to start protecting your most important data.
